"Enormously practical, elegant in execution . . . every page holds clinical wisdom . . . I have never seen such great teaching videos on soliciting suicidal ideation. They are a treasure, and I believe that many lives will be saved by those lucky enough to view them."

"Every psychiatric resident should read this entire book before taking his or her first night of call. Every resident. In fact, I recommend reading it twice. I almost forgot to mention, Shea's extraordinary streaming videos will thrust this book to the forefront of web-based learning. Trust me on this point. They're fabulous."

"Throughout the text, Shea integrates cultural humility, the client perspective, clinical wisdom, and the best that research has to offer. The accompanying videos are the most amazing instructional videos I've ever seen . . . I hate to say it, but a medical doctor has written the best social work interviewing text on the market."
